Nature Of Opinion

Docket Number: E-01345A-16-0036 Docket Position: Against

I have solar on my house, and I feel I am doing my part to reduce my usage of electricity as well as helping the environment. I am writing to state that I do not support and utility especially APS if they request a Demand Charge on residential properties. It appears confusing and a blatant attempt to to extract more fee income from my property. I do not run high usage during peak hours and take every opportunity to reduce my usage. If APS feels I am not contributing my fair share to maintaining the power grid then I would like to see clear documentation of same. If they feel that I am being credited for production at a rate higher then the rate that they can buy electricity on the open market, then I am fine with looking at adjusting the credit I receive for my production. However, I do not feel that I need to be charged demand charges simply to support APS's profits. If their profits are diminished by solar users, I say too bad. I feel that my solar production removes a large burden from APS to have to run their production plants be it coal fired or gas fired. I think solar should be on EVERY household in AZ given our climate. Again, I DO NOT support any Demand Surcharges that may be proposed. If a compromise can be reached on solar credits, I feel that is a more equitable solution.
