DATE: July 18, 2013

FROM: Trisha Morgan, Executive Aide

SUBJECT: Comment Letters
Arizona Public Service Company E-01345A-13-0248

Chairman Stump’s office has received 185 significantly identical computer generated email communications regarding net metering. Attached is a sample of the email received.
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

John W. Forrester
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

arvid Thompson
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those of us on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans and retirees to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

Doreen Kelly

jerry micko
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. For every $3 they send to the grid they get credit for $16. With this they get a tax deduction from the Fed's and most States. When they don't pay for that service, the rates we pay go up. The current net metering policy requires us to pay five times the market value for solar customers' excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

GARY MICHAEL

Harold Hein
Dear Corporation Commissioner,

I am an Arizona voter and utility customer and I am writing to urge you to protect net-metering.

Net metering ensures that solar customers like me receive fair credit for the valuable clean power we deliver to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go solar, and to drive the growth of a successful Arizona industry.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments.

Home and business owners spend their own money to install systems that provide many benefits to the grid and other ratepayers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they’re willing to pay for it.

I urge you to protect net metering.

Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

Thomas Cropp
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

Greg Zucco
Greetings from Tempe. I want to give my opinion about the renewable energy mandate which I see as stealing tax-payer dollars and a 100% "feel good" fraud.

Your forms are very complicated and I have no idea how to send my opinion to everybody on one form. You also ask for numbers and such and why is this all so complicated?

Thank you.

Edward Seiler
edwardseiler33@icloud.com
The renewable energy mandate is a 100% fraud. Solar power is of no use during peak (dark) hours in winter; in summer I subsidize them as soon as the sun goes down.

Plus at Holdeman Elementary school in Tempe, an unbelievable amount of steel was used (at Ariz. State Univ too) and great amounts of silver to build these panels. How is that good for the environment when countless tons of steel and silver are used?

Natural gas is very clean and is the future. Burn natural gas to save the environment.

Audubon Society says the highly intermittent wind energy kills 1,000,000 (yes one MILLION) birds each year world-wide. Plus wind-mills take countless tons of steel and copper, which must be mined.

Eliminate all subsidies for renewable energy and charge solar uses much money extra, for I do not want to subsidize them.

DAVID SIMMONS
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We know why solar companies are against net metering reform — their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

B. Gulino
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

Bill Truchan
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

Robert Blue
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes like me. I can't afford solar for my house, and I can't afford to subsidize people who can buy solar. It is really upsetting when I conserve power and my rates go up. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don't pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers' excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That's why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers. Question: If I elect to use green power why do I have to pay more for it?

Thank you.
Fred Spinler

We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

Chet Zwissler
Dear Commissioner,

The current net metering system is not hurting Arizonans, particularly seniors and those on fixed incomes, APS is! We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. They do pay for that service, the rates we pay go up due to APS asking for more profits. Furthermore, the current APS policy is just asking for higher profits from everybody.

I know solar companies are against net metering reform – their bottom line will be hurt, so will the economy, and environment. Forcing hardworking Arizonans to subsidize APS is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers, change the way APS and SRP is allowed to increase rates and gain huge profits. Please leave net metering as it is as that will ensure fair rates for all customers.

Thank you.

Jay Bodam
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We know why solar companies are against net metering reform — their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

Jean Schmidt
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We support solar power and want it to be sustainable in the long term. That's why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

DARRELL DODD
Dear Commissioner,

I support solar and know customers with solar should be compensated for the excess energy they produce. However, those who can't afford solar shouldn't be required to subsidize those who can through forcing utilities to pay unfair prices for excess electricity by solar and then passing the cost onto those who don't have solar. The net metering system needs to be fixed so it's fair for all customers.

Thank you
Mrs. Rachel Bradshaw

Dear Commissioner,

The current net metering system is seriously hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they DON'T pay for that service, the rates WE pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.

We fully know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That’s why rates MUST BE FAIR to all customers. Please support net metering reforms that will ensure fair rates for all customers.

SEMPER FIDELIS,

Larry Osborn
Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don’t pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers’ excess power.
