DELETE Findings of Fact No. 90

INSERT: New Finding of Fact

"In this interim rates case, we are not prepared to alter the monthly minimum charges in the current rates. We agree with the company that it is better in this instance to collect the revenue for interim rates with a flat volumetric commodity rate. We find the volumetric surcharge would make calculating refunds easier if necessary. A volumetric surcharge would benefit customers that use less water than average and would give customers more control over their bill."
